

**Date:** October 1, 2023

**Re:** Lot Code Format Update

**Bulk Products Code Format:** PPPYYDDD99

- P** identifies the packaging plant (see list of identifiers below)
- Y** identifies the last two digits of the year
- D** identifies the Julian day of the year
- 99** identifies the numeric sequential number for the day

**Example:** CRK2027404

**Packaged Products Code Format:** PPPYYDDDN

- P** identifies the packaging plant
- Y** identifies the last two digits of the year
- D** identifies the Julian day of the year
- N** a single digit number that identifies the source (bulk) lot for this lot – used by co-packers

**Example:** CRK20274 or SF220274-2

**Note:**

**Sugar Producers:** There should be no spaces between characters in the lot code. However, materials packaged by sugar producers may have numbers or letters following the “DDD.” There should be a space between the lot code and these additional characters. These designations provide information for the producing plant and are **not** a part of the lot identity.

**Co-packers:** Materials packaged by co-packers may have a dash and a number following the “DDD.” These tie the lot to a specific source lot and **are** a part of the lot identity.

See next page for plant identifiers.

**Plant Identifiers:** (**Bold** - sugar producers; *Italics* – co-packers)
