Re: Testing for Pesticides in Sugar

Pesticide Residue is tested annually. The testing is performed pursuant to the QuEChERS GC-MS/MS and LC-MS/MS methods for detection of pesticide residues in food. Our sugar is compliant with the CODEX standards for pesticide residue. A list of the pesticides tested for is available upon request.

We moved to this schedule after sufficient historical data indicated that more frequent testing was not required.

Please call or write if you have any questions or concerns. United Sugar Producers and Refiners is committed to continued service to our valued customers.

Janet A. W. Harriman
Director of Quality and Safety
